

# OV MODEL

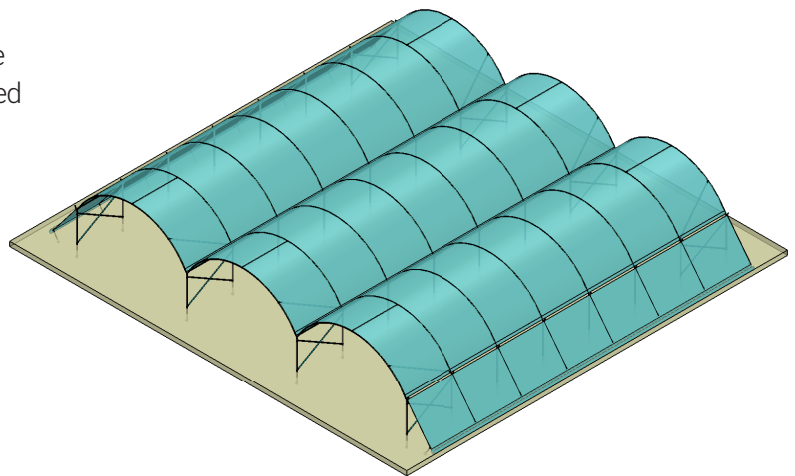

# OV MODEL

Our Multi-Tunnel OV Model is the ultimate solution for pro growers, offering advanced structural technology that is hassle-free and affordable.

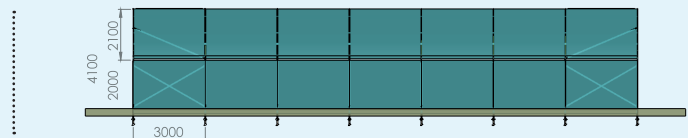

- Strong, innovative structure
- Fast and simple to assemble
- Minimal operational costs

## Available in the following sizes:

6.6m | 7.2m

Optional: any custom size between 5.5m-9m

## SUITABLE FOR THE FOLLOWING CROPS:

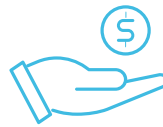

## STRUCTURAL TECHNOLOGIES

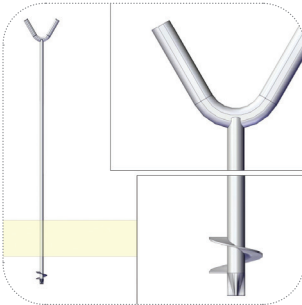

### Material

Made of homogeneous, high tensile steel - 30% stronger than common greenhouse steel

### Installation

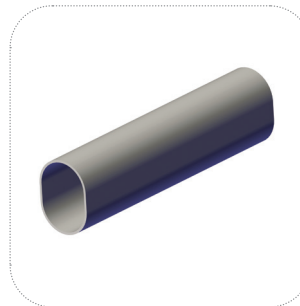

Simple, quick, costeffective structure installation and easy

- Self-drilling posts, no concrete needed
- Easy installation, fewer parts to assemble

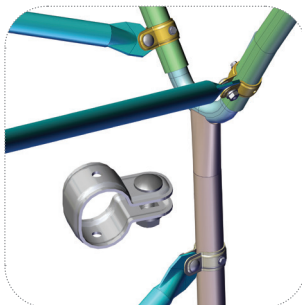

- Superior oval pipes
- Resistant to strain
- Larger tunnel width
- Stronger and sturdier structure

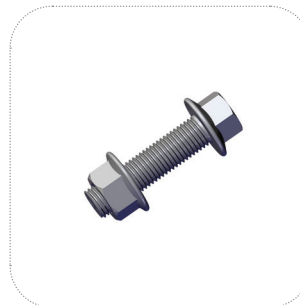

### Oval Tubes are Superior

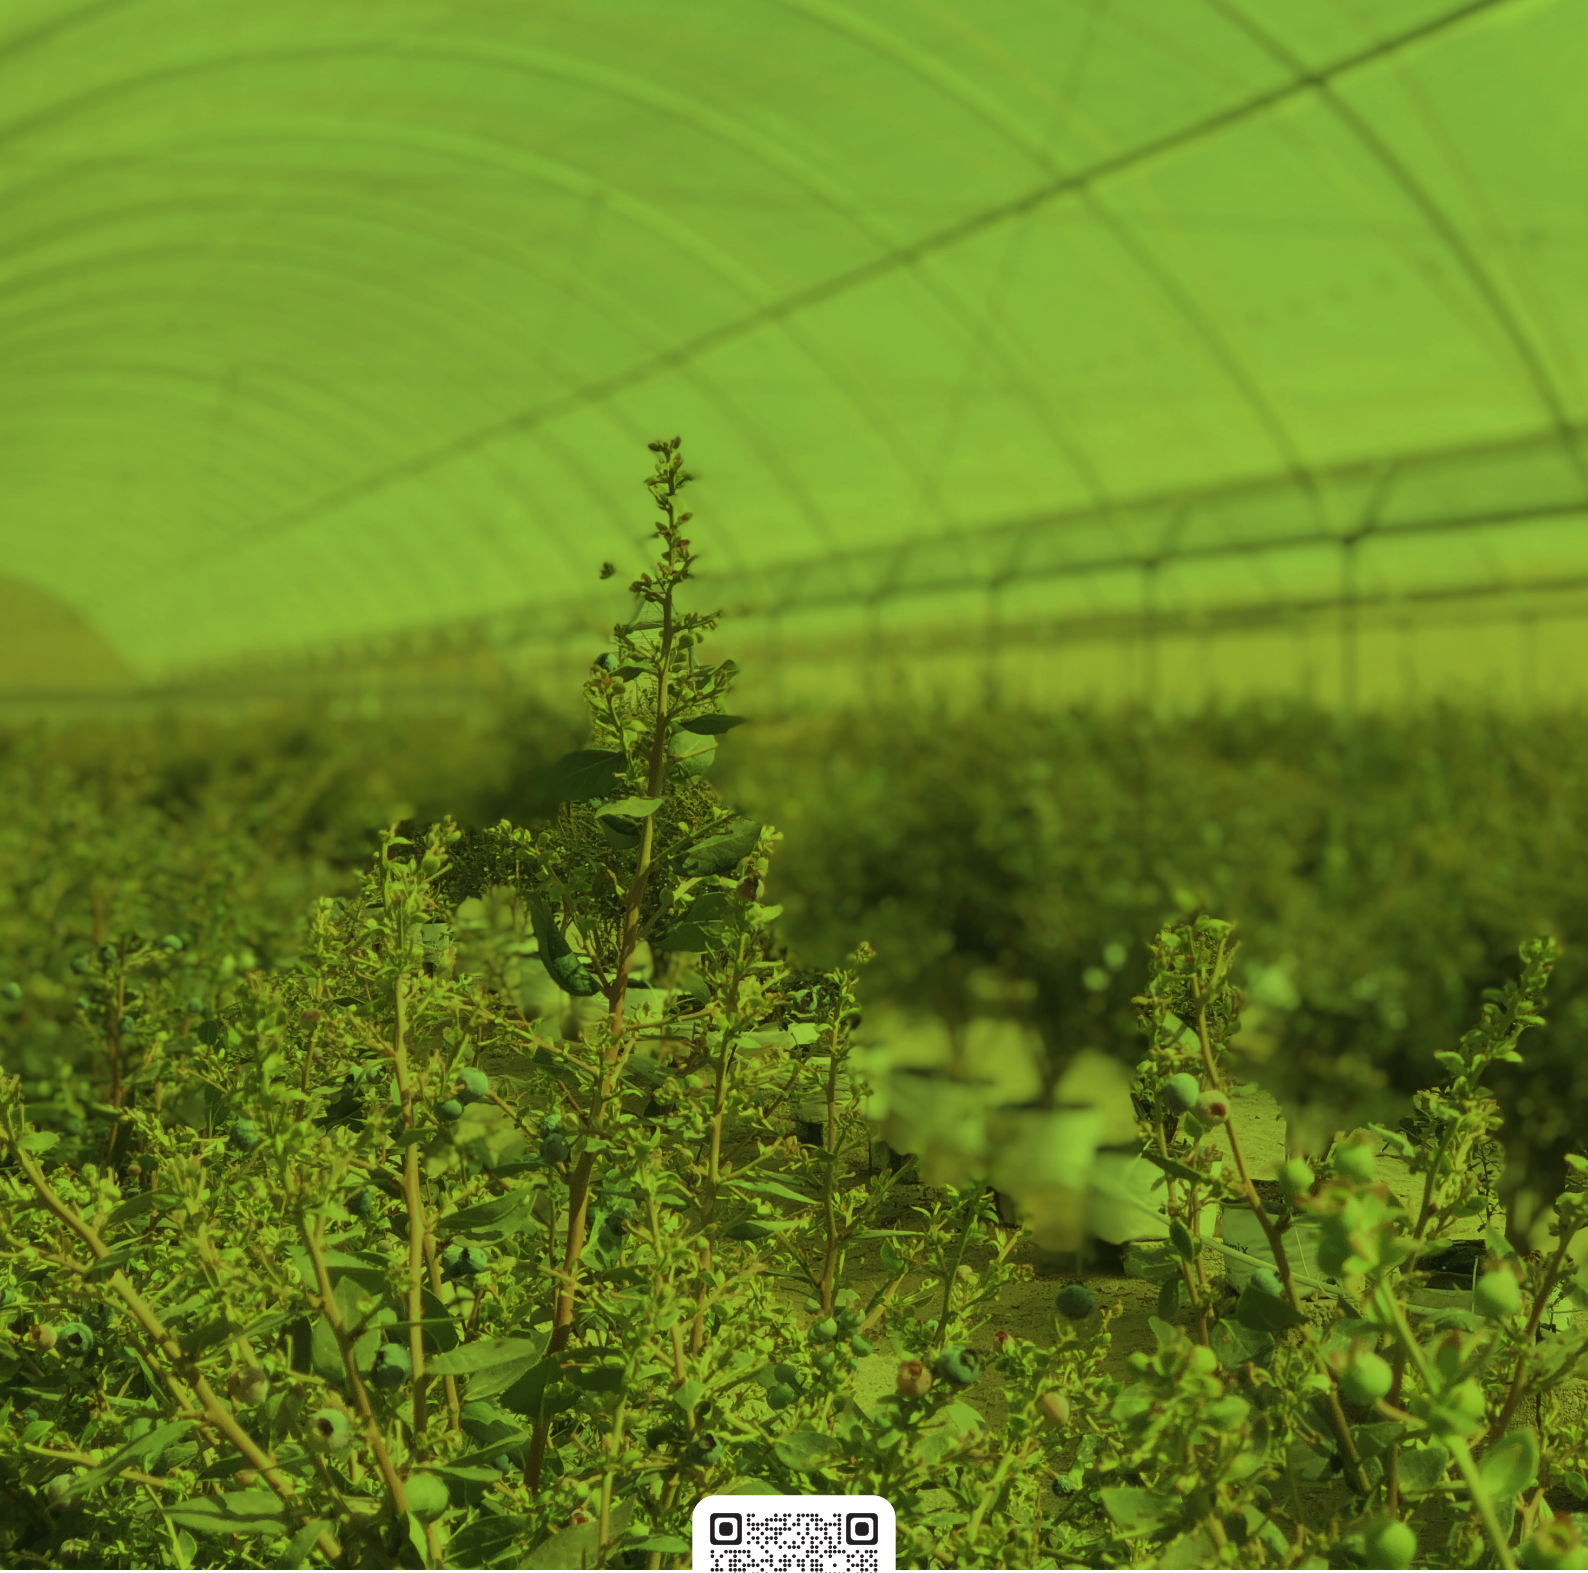

The OV Model arches made of 40\*30 oval tubes, which are stronger and more resistant to strain than round tubes.

Pipe bands create distance between plastic and pipes to extend product lifetime of plastic film

- High quality flange bolts and nuts with Geomet® coating, tested for 500 hours of salt spray in accordance with ASTM B117-11
- Excellent corrosion protection
